CAREER OBJECTIVE

Motivated Computer Science student (2026) with strong foundations in Data Structures, Algorithms, and Full Stack Development. Hands-on experience in cloud computing, REST APIs, and scalable application design through internships and projects. Seeking an entry-level software engineering role to apply technical expertise, problem-solving, and Agile methodology skills.

EDUCATION

Jawaharlal Nehru Technological University, Kakinada, Andhra Pradesh Sep 2022 – May 2026
Bachelor of Science in Computer Science

EXPERIENCE

NXT WAVE, Hyderabad May 2025 – Ongoing
Teaching Assistant

- Guided 212+ learners, resolving 250+ technical doubts across DSA, SQL, and web development.
- Mentored students in implementing problem-solving techniques, improving coding efficiency by 30%.

Google Cloud Jan 2025 – Mar 2025
Generative AI Virtual Internship

- Completed internship on Generative AI, covering LLMs, Transformers, Vertex AI, and Responsible AI.
- Applied cloud deployment practices to build scalable ML solutions.

Bluestock Fintech, Mumbai Oct 2024 – Dec 2024
Software Engineer Intern

- Executed test cases for web applications and REST APIs using Postman and browser DevTools.
- Built and tested full-stack Amazon clone projects, strengthening microservices and API skills.
- Implemented CI/CD pipelines in Jenkins, reducing build-test cycles by 40%.
- Automated test result visualization and daily reporting using HTML, JavaScript, and CSS.

PROJECTS

News Aggregator with AI Chat and Realtime Features — React.js, Node.js, Express, MongoDB, Redis, OpenAI API, Socket.IO 2025

- Built a full-stack news platform fetching and ranking global news using APIs.
- Integrated AI chatbot with OpenAI API and Socket.IO for real-time conversational queries.
- Reduced API response time by 60% using Redis caching and optimized server load.
- Logged user activity and analytics with MongoDB, secured APIs with rate limiting.
- Enhanced UX with dark mode, animated skeleton loaders, and live suggestions.

Scalable Employee Management System — React.js, Node.js, Express.js, MongoDB, REST API, Tailwind CSS 2025

- Designed and developed a role-based access system for employee data management.
- Created modular REST APIs with Express.js and MongoDB schema design for CRUD operations.
- Integrated secure authentication, validation, and fault-tolerant error handling.
- Deployed app with Docker, ensuring scalability and cross-environment compatibility.
- Increased efficiency by enabling real-time validation and reducing data errors by 25%.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript (ES6+), SQL, HTML5, CSS3, C++, DSA

Frameworks: React.js, Node.js, Express.js, Django, REST APIs

Databases: MongoDB, MySQL, Redis

QA & Testing Tools: Postman, Chrome DevTools, Jenkins, Git, GitHub

Developer Tools: VS Code, Linux, Docker, Google Cloud Platform, AWS

Concepts: Full Stack Development, Microservices, CI/CD, Agile, SDLC

CERTIFICATIONS & ACHIEVEMENTS

- HackerRank:** Problem Solving in Python (Basic & Intermediate) [\[Verification Link\]](#)
- Google Cloud:** Develop GenAI Apps with Gemini and Streamlit (Skill Badge, 2025) [\[Credly Verification\]](#)
- LeetCode:** Solved 200+ problems in DSA, algorithms, and system design [\[Profile Link\]](#)
- Consistently improved global rank through daily coding challenges and contests.
